UM's Top Scholar by H-Index

The **h-index** is an author-level metric that combines a scholar's productivity with the citation impact of their publications. It is calculated by counting the number of publications for which an author has been cited by other authors at least the same number of times.

[Professor Georgios Yannakakis](#), Director of the [Institute of Digital Games](#), is Malta's **highest ranked scholar** by [h-index (52)](#). That means, at least 52 of his papers have each been cited at least 52 times. This places Prof. Yannakakis among the top researchers in the area of **computer science and electronics**.

Do you have an example of good QA practice at your unit which you would like us to share? Get in touch with us at **qac@um.edu.mt**
